

Danil Tkachenko

Senior .NET Python AI/ML Engineer

Profile

Dynamic AI/ML Engineer with 6 years of experience driving innovative solutions across various platforms. Expertise in developing scalable systems and automating critical processes, significantly enhancing operational efficiency. Proficient in C# and Python, with a strong foundation in cloud technologies and software development methodologies. Committed to leveraging cutting-edge AI techniques to create transformative applications and conversational agents that streamline business operations. Passionate about delivering high-quality software that meets rigorous standards in performance and reliability.

Employment History

AI/ML Engineer C# Python at NN, Prague

October 2024 — Present

- Automated payments OCR pipeline: Developed and deployed an OCR pipeline for automated payments, enhancing efficiency for insurance transactions across Czech Republic.
- NN AI bot: Engineered a business-specific AI bot using Microsoft Semantic Kernel, streamlining internal operations via automated workflows.
- Collaborated on cross-functional teams to integrate machine learning models with existing software infrastructure.

Cloud Software Developer at Continental, Otrokovice

August 2022 — October 2024

- On-site with the Special Global Team
- Development Continental Cloud company's mission-critical Cloud that operate seamlessly across all continents and in nearly every country worldwide. These services range from powering advanced automotive applications to providing robust support for software that drives entire factories, ensuring reliability and performance on a global scale.
- Experience with problems of large scale, and handling millions of connections, including in a high-volume or critical production service environment

Software Developer at GETMORE, Zlín

July 2020 — August 2022

- On-site as a primary developer
- Responsible for the full development cycle of mobile and web applications. This includes everything from initial development to publishing, as well as creating and managing certificates for marketplaces like the AppStore, PlayMarket, Alza
